

Retail pharmacy network

A well-balanced pharmacy network offers you convenient access and competitive discounts for brand and generic medications. Our national retail pharmacy network includes more than 64,000 chain and independent retail pharmacies, so you're sure to find one close to home or work.

Using your ID card

When you fill a prescription through a participating pharmacy, show the pharmacy your ID card so they can submit a claim for coverage by your pharmacy benefit plan. When you pick up your prescription, the pharmacy then collects your applicable member contribution as defined by your plan.

If you do not present your ID card or you fill a prescription at a non-participating pharmacy, you pay the full retail price for your medication. If the prescription is eligible for coverage under your pharmacy benefit plan, you may submit a claim to request reimbursement (forms are available at **optumrx.com** or by calling customer service).

When you submit a claim using the reimbursement form, OptumRx first determines if your plan covers the medication. If it is covered, the amount you receive is based on contracted pharmacy rates less your plan's out-of-pocket member contribution. All prescription claims are subject to your pharmacy benefit plan's rules and restrictions.

Finding a network pharmacy

You can choose from three easy ways to find participating pharmacies near you:

1. Review the partial list included on the following pages.
2. Go to our website and use the **LOCATE A PHARMACY** tool.
3. Contact customer service using the number on the back of your benefit plan member ID card.
