

Did you know?

Did you know that your EAP offers more than just mental health counseling?
You can also find resources for everyday legal concerns, such as:

Real estate. Buying a home is typically the most expensive purchase you will make in your lifetime. An expert can assist with this daunting task.

Estate planning, wills and trusts. Protect your family and prepare instructions on distributing property to beneficiaries after your death.

Landlord and tenant issues. Whether you are renting out your property or are a lessor who needs assistance, get the help you need.

Bankruptcy. An experienced attorney can help navigate the legal system and make it more likely you will be successful with your case.

Plus, get assistance with other concerns such as adoption, divorce, criminal cases, probate and more.

SupportLinc contracts with a nationwide network of more than 20,000 experienced attorneys to consult employees and family members regarding their legal concerns. Callers can obtain consultation for any legal matter, except for disputes or actions between an employee/dependent and their employer or EAP or for business issues.

Legal consultants answer calls 24/7/365

Note: Most attorneys are available during standard business hours (typically 9 a.m. - 5 p.m. in the relevant time zone). If a participant calls after hours, a Care Advocate will perform the intake and gather as much information as possible. On the next business day, you'll be connected with a telephonic attorney or SupportLinc will immediately begin contacting attorneys for a local consultation.
